

Introduction to eMoney

eMoney is the financial planning platform we use to track and analyze your financial health. This program is also available for you to utilize to track your own personal financial goals and more.

eMoney: Your Personal Financial Management Website

- eMoney serves as your own personal financial management portal. This software contains secure, comprehensive tools that empower you to take charge of your financial life with our team as your quarterback. You will leverage account aggregation, view your net worth, and track your cash flow, financial goals, and spending, all in one place. This platform has your own financial goal tracking, unlimited document storage, self-designed budgets to track spending, and account aggregation, to provide you with your complete financial picture at your fingertips.
- A Window into Your Financial World/Seeing Your Full Financial Picture in One Place:

 Organizer	Enter in your essential details and connect to your financial accounts.
 Goals	Add your financial goals, track progress towards funding and achieving those goals, and gauge how these goals impact your long-term financial outlook.
 Spending	Monitor your cash flow transactions and create budgets to help you stay on track.
 Investments	Learn more about your asset allocation, view the value of your current holdings, and take a look at your asset types for a detailed breakdown of each of your investments.
 Vault	This is your secure digital document storage repository. Upload all of your important and legal documents for easy tracking, storage, and access.

The image shows two overlapping screenshots of the eMoney website. The top screenshot is the registration page for 'afs financial group'. It prompts the user to 'Choose a username and password to access your website.' and shows input fields for 'Username' (with the example 'nataliea@afsfinancialgroup.com'), 'Password', and 'Confirm Password'. Below these fields are 'Register' and 'Forgot Password' buttons. To the right, there are 'Password requirements' listed as radio button options: 'Contains at least 6 characters', 'Contains lowercase letters', 'Contains uppercase letters', 'Contains numbers', and 'Does not contain username, first name, or last name'. The bottom screenshot is titled '2-Factor Authentication' and asks the user to 'Please enroll in 2 Factor Authentication by entering your phone number below.' It explains that a verification code will be sent via text message and asks 'What phone number would you like to use to receive the verification code?'. A text input field contains the number '(123)-456-7890' and an 'Enroll' button is at the bottom.
